

# AVIAZAPCHAST PLC Today

Moscow 2019

Today, Aviazapchast PLC is one of the leading Russian private companies specializing in technical support for aircraft of civil and dual application of Russian and foreign origin.

The Company's core business consists in carrying out integrated MRO programs for airplanes and helicopters, supplying spare parts, components and major assemblies, navigation systems, test equipment and high-tech alloys for aerospace companies, implementing aircraft upgrading programs, as well as providing various logistics and warehousing services.

Aviazapchast PLC has been actively supporting its presence in the global aviation market, successfully participating in international tenders and major trade fairs and air shows in Russia, USA, France, India, China, South Africa, Chile and other countries, demonstrating advanced solutions and possibilities for the customers and the partners aiming at provision of operational reliability and safety of aircraft and related equipment.

Now, the permanent representative offices of Aviazapchast PLC are operating in Algeria, India, Vietnam, Mexico and France.

Aviazapchast PLC is committed to a long-lasting strategic mutually beneficial cooperation with every partner. Today we are proud to say that we have solid relationships with many aeronautical enterprises in Russia, the CIS and other countries. Among long-term customers of Aviazapchast PLC there are various organizations, authorities and companies in 30 countries all over the world.

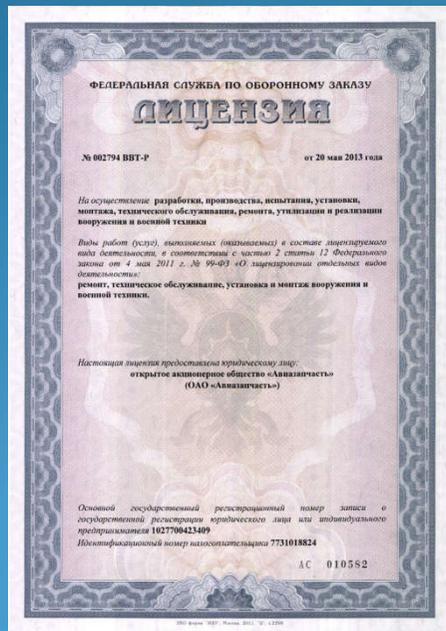

# Background

Aviazapchast PLC is a successor of Aviazagranpostavka government enterprise, which was established in 1968 as an export agency under the USSR Aviation Ministry to support operation of Soviet-made aircraft supplied abroad.

As a result of privatization in 1994, the company was transformed into Aviazapchast PLC.

# Licenses and Certificates

Aviazapchast PLC holds licenses and certificates authorizing it to conduct business in the area of manufacturing and realization, MRO of aircraft and aeronautical goods including those of dual application, both internationally and in Russia.

# Licenses and Certificates

Aviazapchast PLC has been certified by Bureau Veritas Certification RUS as complying with the requirements of the International Standard AS EN 9120-2009.

# Supplying Aircraft, Assemblies, Modules and Spare Parts

Transport and special-purpose airplanes and helicopters,  
including those intended for fire fighting, rescue and EMS  
operations

# Supplying Components, Assemblies and Spare Parts

Aviazapchast PLC supplies original spare parts, components, assemblies, engines for all types of civil and dual application airplanes and helicopters sourced directly from OEMs or the Company's own stock.

# Maintenance, Repair, Overhaul (MRO), Modification and Upgrading

Aviazapchast PLC provides the package of services on organization and carrying out of aircraft MRO, modification and upgrading. The years of experience in the industry enable our company to solve the most complicated and nonstandard tasks related to aircraft repair, including:

1. Evaluation of aircraft technical condition, extension of assigned technical life/ TBO.
2. Reconditioning of aircraft, including that performed by the field staff at the Customer's base.
3. Implementing aircraft modifications – industry bulletins.
4. All types of repair and maintenance of airplanes, helicopters, aeroengines and components.

5. Warranty and post-warranty support.
6. Aircraft upgrading:
  - Re-engining – changing aircraft engines;
  - Modernization of airborne hardware.
7. Modification of aircraft cabins for various configurations including VIP, business, economy class configurations, modification of interiors, i.e. into easily convertible cargo-and-passenger version.

8. Exterior painting of various types of aircraft, including development of design and painting pattern.

MRO services are provided either by the Company's own **MRO Center - Aviazapchast Technics**, or in cooperation with the industry leading companies.

# Supplying Ground Support Equipment (GSE)

## HELIWAGON

# START PAC

Power supply units

Portable starting units

## Ground power units

## Metals and Consumables

Aviazapchast PLC supplies metals of various properties and for various applications, as well as a range of alloys, including special alloys, used in aerospace industry.

The whole range of metal products is supported by quality certificates, complies with the technological standards, manufacturing and operating regulations.

Aviazapchast PLC offers for supply consumables of aeronautical and general industry grade, including oils, greases, adhesives, putty pastes, sealants, paints, primers, rubbers and hoses.

# Flight and Technical Personnel Training

The Aviazapchast PLC Training Center, holding the required license and cooperating with other leading training centers, provides training for customers' flight and technical personnel.

# Logistics

# Aviazapchast Logistic

Today, Aviazapchast PLC is a well established member of the international logistics, having the full export and import flow management cycle.

Aviazapchast Logistic is a structural unit of Aviazapchast PLC. It provides the whole range of services relating to preparation of the documents and goods for customs clearance, including: acquiring the permits and licenses, preliminary classification decisions, expert opinions. Aviazapchast Logistic organizes and carries out various types of transportations to any destination, including those by motor transport, railroad, sea, air and multimodal transportations of any cargo types within both Russia and the CIS and all over the world.

# Warehouse Facilities

Aviazapchast PLC possesses its own office and warehouse facilities in Moscow and Moscow Region, with the 48.5 thousand sq. m total floor area and convenient approaches.

Aeronautical goods are stored in Moscow at the automated certified warehouse with the total floor area of 14.7 thousand sq. m.

All the facilities are equipped with up-to-date utility systems, video surveillance systems, and fire alarm and extinguishment systems.

The warehousing processes are managed through the IS AZCH database system that automatically tracks the scheduled maintenance dates for the stored equipment.

The storage conditions at the Aviazapchast PLC warehouses comply with the regulatory requirements for storing aeronautical goods.
